

Turn-Key eDiscovery Service Platform for Litigation Support

Level the Legal Playing Field with Enterprise-Class eDiscovery Made Cost-Effective for eDiscovery Service Providers

► BENEFITS OF TURN-KEY eDISCOVERY

- Levels the eDiscovery playing field for your business and your clients
- Ensures that your data handling is compliant with the Federal Rules of Civil Procedure (FRCP)
- Puts the Capax Discovery team of eDiscovery veterans on your side
- Gives you affordable access to the best eDiscovery infrastructure available
- Offers the most cost-effective eDiscovery method possible
- Removes the burden of provisioning, deploying, and maintaining risk management tools from your business
- Helps you meet deadlines to produce any type of Electronically Stored Information (ESI) to the court
- Helps you to strengthen your customer relationships with supported service offerings from very early in the eDiscovery process
- Offers you the option of using a hosted SaaS model to lower your infrastructure and total cost of ownership

OFFER eDISCOVERY SERVICES BASED ON SUPERIOR TECHNOLOGY AT LOWER COST

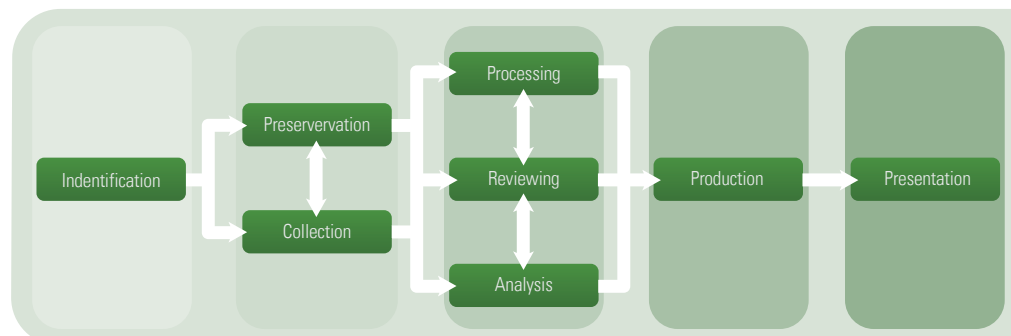

Your team of eDiscovery experts must be armed with the best legal systems in the world to compete with the top eDiscovery providers, but your business cannot afford an eDiscovery arms race. You need a cost-effective platform on which to build your service business.

Capax Discovery offers turn-key eDiscovery solutions for service providers designed to meet your clients' legal challenges head-on by using the world's leading eDiscovery software from Autonomy. We make this platform cost-effective by offering it as a Software-as-a-Service (SaaS) lease. You can also operate the platform as a managed on-site technology. Capax Discovery is the only technology provider working with Autonomy to provide its market-leading solutions as a SaaS option. We combine this with flexible pricing options to bring the costs of working with this eDiscovery platform down into an affordable range for your business.

OFFER eDISCOVERY SERVICES FOR ALL STEPS IN EDRM

The Autonomy eDiscovery suite is unique in offering end-to-end support for all steps in the Electronic Discovery Reference Model (EDRM). Its rich capabilities as offered by Capax Discovery include:

Autonomy IDOL Platform	Industry-leading search indexing engine Platform supporting the entire EDRM process
Autonomy Enterprise Archive Solution (EAS)	Enterprise-class data preservation and collection technology On-site, off-site, and portable configurations
EAS Discovery	Simple-to-use data collection and culling tool Works with archive data in native form Suitable for paralegals and operations staff to use to start the discovery process
Early Case Assessment (ECA)	Sophisticated, graphical search and evidence triage with filtering
Introspect	Best-of-class data processing, review and production platform

Capax eDiscovery Service Platform Spans EDRM to Provide Archive and Legal Hold, Seamless Transition to Early Case Assessment, Collection and Ultimately Review and Production

► WHY CAPAX DISCOVERY?

At Capax Discovery, we offer the only Autonomy-based solution for end-to-end support through the complete EDRM lifecycle. EDRM is an established standard for eDiscovery proven to deliver more relevant data as data volumes are reduced through the production process.

► ABOUT CAPAX DISCOVERY

Capax Discovery, a division of Capax Global, is a platform and service provider for eDiscovery and archiving. Powered by leading search and retrieval technologies from Autonomy, we offer end-to-end solutions to meet the growing regulatory and litigation challenges that confront businesses today. We are an Autonomy Premiere Partner and the only partner to offer turn-key platform solutions and Software as a Service hosting for the complete EDRM lifecycle. We have experience implementing, optimizing and supporting discovery solutions for Fortune 500, FTSE 350 companies and eDiscovery services providers. This experience translates into a better services experience, lower costs, and lower risks for our small and medium sized eDiscovery customers.
